EDUCATION

BS.c in Computer Science at Bar-Ilan University 📅 2021-2025

PROJECTS EXPERIENCE

Real Estate Investment Platform

Developed a web system for real estate investments. The platform is designed to assist users in making informed real estate investment decisions by providing comprehensive, quantitative analysis of potential property investments. **Technologies: Python, Flask, NumPy, MongoDB, React**

Segmentation Model API

Developed a model conversion, preprocessing, and segmentation system using PyTorch, ONNX, and FastAPI. **Technologies: Python, PyTorch, ONNX, FastAPI, Docker**

Autonomous Taxi Service

Built a microservices-based simulation for an autonomous taxi service operating on a city grid.

Technologies: FastAPI, Redis, RabbitMQ, Docker, Docker Compose

Whatsapp Clone

Developed a website (**MERN**) and Android application for chat service like WhatsApp, using Client-Server technologies; **NodeJs, MongoDB, JavaScript, HTML, CSS, SQL, AndroidStudio, WebSockets, Express, and React. MVC and MVVM principles.**

Vector Classifier

A project in C++ about vector classification using the **KNN** algorithm and a **multithreading server-client connection**.

WORK EXPERIENCE

FULL-STACK DEVELOPER AT ELYSIAN-SOFTECH 📅 2025 - Present

- Integrating an AI-powered chat system into small businesses' services, including CRMs, WhatsApp Business, social media, and websites.
- Leading client onboarding and customization, tailoring AI-chat functionality to unique business needs.
- Building and integrating client-specific API endpoints and logic into the core system, including request routing, filtering algorithms, and tool functions for LLM-based responses.
- Developing a Redis-based caching and pooling mechanism to reduce latency by pre-fetching and storing external data (e.g., product catalogs) from client websites.
- Working with a stack including FastAPI (Python) for backend, React for frontend, MongoDB for data, and Redis for caching - all hosted on Azure Cloud.
- Using Git and Azure DevOps for version control and collaboration, and Jira for project management.
- Continuously contributing to both client-specific projects and core platform improvements on both frontend and backend.

SECURITY SHIFT MANAGER AT CHEVRON 📅 2019 - 2023

Website development - Took the initiative to develop and implement an interactive website (Frontend and backend) assisting the company's security team. The website facilitated streamlined work arrangement submissions, provided a platform for forums, and fulfilled various work-related requirements. Technologies used: **NodeJs, MongoDB, JavaScript, HTML, and CSS.**

COMBAT SERGEANT IN SPECIAL UNIT AT IDF 📅 2015 - 2018

- A fighter in an elite unit in the IDF - a paratrooper patrol.
- Operating in extreme situations, coping under complex pressure situations while making decisions.
- Lead and Command a small team of fighters, carrying out proactive operations in the field.

SKILLS

Languages: C, C++, C#, Java, Python, NodeJs/JS, Go, Assembly

Frameworks: React, NextJs, FastAPI, Linux, Android, MongoDB, Postgres, MySQL, GIT, Jira, Docker, Redis, Kafka, RabbitMQ, Kubenetes

Principles: OOP & Design patterns, MVC, MVVM, MERN, APIs & RestAPI, communication protocols, Parallel programming
